1. Product and Company Identification

Product Name: Di - 2 - ANEPEQ (JPW 1114)

Manufacturer/Supplier: AnaSpec, Inc.
www.anaspec.com
34801 Campus Drive
Fremont, CA 94555
Tel: 510-791-9560
Fax: 510-791-9572
Email: service@anaspec.com

Catalog Number: AS-84713
Unit Size: 5mg

2. Hazards Identification

Emergency Overview: We do recommend handling all chemicals with caution. Use proper protective equipment when handling chemicals. The toxicological properties of this material have not been fully investigated. Use appropriate procedures to prevent opportunities for direct contact with skin or eyes and to prevent inhalation.

GHS Hazard Classification:
GHS Physical Hazards: N/A
GHS Health and Environmental Hazards: N/A
GHS Signal Words: N/A
GHS Hazard Statements: N/A

GHS Precautionary Statements:
P260: Do not breathe dust/fume/gas/mist/vapours/spray
P280: Wear protective gloves/ protective clothing/eye protection
P302+P350: If ON SKIN- gently wash with plenty of soap and water
P305+P351+P338: If in eyes, rinse cautiously with water for several minutes. Remove contact lenses if possible. Continue Rinsing.

Potential Health Effects for:
Inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Good hygiene practice requires that exposure is avoided and that suitable control measures be used in an occupational setting.
Ingestion: If swallowed, wash out mouth with water provided person is conscious. Call a physician.

Skin: In case of contact, immediately wash skin with soap and copious amount of water.

Eyes: In case of contact, immediately flush eyes with copious amounts of water for at least 15 minutes.

Chronic Exposures: No information available. We recommend limiting prolonged exposure.

Target Organs: N/A

HMIS Classification:
- Health Hazard: 0
- Flammability: 0
- Physical Hazard: 0

NFPA Rating:
- Health Hazard: 0
- Fire: 0
- Reactivity Hazard: 0

3. Composition

Ingredients/Components:

Chemical Name: Di - 2 - ANEPEQ (JPW 1114)
- Molecular formula: C_{26}H_{35}Br_{2}N_{3}
- Molecular weight: 549.4
- CAS-No: N/A
- EC-No: N/A

4. First Aid Measures

Inhalation: If dust is inhaled, remove from contaminated area. Encourage patient to blow nose to ensure clear passage of breathing. If irritation or discomfort persists seek medical attention.

Ingestion: If swallowed do NOT induce vomiting. If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration. Observe the patient carefully. Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink. Seek medical advice.

Skin: If skin or hair contact occurs:
Flush skin and hair with running water (and soap if available).
Seek medical attention in event of irritation.

**Eyes:**
If this product comes in contact with the eyes:
Wash out immediately with fresh running water.
Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids.
If pain persists or recurs seek medical attention.

### 5. Fire Fighting Measures

| Extinguishing media: | Water spray or fog.  
|                     | Alcohol resistant foam.  
|                     | Dry chemical powder.  
|                     | BCF (where regulations permit).  
|                     | Carbon dioxide |

| Special firefighting procedures: | Alert Emergency Responders and tell them location and nature of hazard.  
|                                  | Wear breathing apparatus plus protective gloves.  
|                                  | Prevent, by any means available, spillage from entering drains or water course.  
|                                  | Use water delivered as a fine spray to control fire and cool adjacent area.  
|                                  | **DO NOT** approach containers suspected to be hot.  
|                                  | Cool fire exposed containers with water spray from a protected location.  
|                                  | If safe to do so, remove containers from path of fire.  
|                                  | Equipment should be thoroughly decontaminated after use. |

| Unusual fire and explosions hazards: | Emits toxic fumes under fire conditions |

### 6. Accidental Release Measures

| Spill response | Remove all ignition sources.  
|               | Clean up all spills immediately.  
|               | Avoid contact with skin and eyes.  
|               | Control personal contact by using protective equipment.  
|               | Use dry clean up procedures and avoid generating dust.  
|               | Place in a suitable, labeled container for waste disposal |

| Containment | Avoid all personal contact, including inhalation.  
|            | Wear protective clothing when risk of exposure occurs.  
|            | Use in a well-ventilated area.  
|            | **DO NOT** enter confined spaces until atmosphere has been checked.  
|            | **DO NOT** allow material to contact humans, exposed food or food utensils.  
|            | Avoid contact with incompatible materials.  
|            | When handling, **DO NOT** eat, drink or smoke.  
|            | Keep containers securely sealed when not in use.  
|            | Avoid physical damage to containers.  
|            | Always wash hands with soap and water after handling.  
|            | Use good occupational work practice.  
|            | Empty containers may contain residual dust which has the potential to accumulate following settling. Such dusts may explode in the presence of an appropriate ignition source. |
7. Handling and Storage
Store at -20°C desiccated and protected from light. Store away from oxidizing agent.

8. Exposure Controls / Personal Protection

**Engineering controls**
Local exhaust ventilation is required where solids are handled as powders or crystals; even when particulates are relatively large, a certain proportion will be powdered by mutual friction.
Exhaust ventilation should be designed to prevent accumulation and re-circulation of particulates in the workplace.
If in spite of local exhaust an adverse concentration of the substance in air could occur, respiratory protection should be considered. Such protection might consist of:
(a): particle dust respirators, if necessary, combined with an absorption cartridge;
(b): filter respirators with absorption cartridge or canister of the right type;
(c): fresh-air hoods or masks
Build-up of electrostatic charge on the dust particle, may be prevented by bonding and grounding.
Powder handling equipment such as dust collectors, dryers and mills may require additional protection measures such as explosion venting.
Air contaminants generated in the workplace possess varying "escape" velocities which, in turn, determine the "capture velocities" of fresh circulating air required to efficiently remove the contaminant.

**PPE**
Use personal protective equipment

12. Ecological Information

No information available.

13. Disposal Considerations

All waste must be handled in accordance with local, state and federal regulations. Legislation addressing waste disposal requirements may differ by country, state and/or territory. Each user must refer to laws operating in their area. In some areas, certain wastes must be tracked.
