SECTION 4: First aid measures

4.1. Description of first aid measures
General information:
When in doubt or if symptoms are observed, get medical advice.

Following inhalation:
No special measures are necessary. Provide fresh air.

Following skin contact:
In case of eye irritation consult an ophthalmologist. Rinse immediately carefully and thoroughly with eye-bath or water.

Following ingestion:
IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

Self-protection of the first aider:
No special measures are necessary.

4.2. Most important symptoms and effects, both acute and delayed
The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11.

4.3. Indication of any immediate medical attention and special treatment needed
Notes for the doctor:
Treat symptomatically.

SECTION 5: Firefighting measures

5.1. Extinguishing media
Suitable extinguishing media:

Unsuitable extinguishing media:
Strong water jet.

5.2. Special hazards arising from the substance or mixture
Formation of toxic gases is possible during heating or in case of fire.

5.3. Advice for firefighters
Wear a self-contained breathing apparatus and chemical protective clothing.

5.4. Additional information
Do not inhale vapors and fumes. Co-ordinate fire-fighting measures to the fire surroundings. Move undamaged containers from immediate hazard area if it can be done safely. Use caution when applying carbon dioxide in confined spaces. Carbon dioxide can displace oxygen. Use water spray jet to protect personnel and to cool endangered containers. Collect contaminated fire extinguishing water separately. Do not allow entering drains or surface water.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures
No special measures are necessary. Use appropriate respiratory protection. Provide adequate ventilation.

6.2. Environmental precautions
Ensure that waste is collected and contained. Contain leaks or spills within cabinets with removable trays.

6.3. Methods and material for containment and cleaning up
Treat the recovered material as prescribed in the section on waste disposal. Collect in closed and suitable containers for disposal. Absorb with liquid-binding material (e.g. sand, diatomaceous earth, acid- or universal binding agents). Wipe up with absorbent material (e.g. cloth, fleece).

6.4. Reference to other sections

6.5. Additional information
Not available
SECTION 7: Handling and Storage

7.1. Precautions for safe handling

**PROTECTIVE MEASURES**

No special measures are necessary. Use only in well-ventilated areas. If local exhaust ventilation is not possible or not enough, the entire work area must be ventilated by technical means. Provide adequate ventilation as well as local exhaust at critical locations. Vapours/aerosols should be exhausted directly at the point of origin.

**Advices on general occupational hygiene**

Wash hands before breaks and after work. Remove contaminated, saturated clothing. Work in well ventilated zones or use proper respiratory protection.

7.2. Conditions for safe storage, including any incompatibilities

Keep container tightly closed in a dry, cool, and well-ventilated place. Keep container in upright position in order to prevent leakage.

**Requirements for storage rooms and vessels**

Ensure adequate ventilation of the storage area. Store at -20°C.

7.3. Specific end uses

Apart from the uses mentioned in section 1.2 no other specific uses are stipulated.

SECTION 8: Exposure controls/personal protection

8.2. Exposure controls

Appropriate engineering controls

Provide adequate ventilation as well as local exhaustion at critical locations. Personal protection equipment

- **Eye/face protection**: Suitable eye protection: Goggles
- **Skin protection**: Hand protection: Disposable gloves
- **Body protection**: Lab coat
- **Respiratory protection**: Respiratory protection necessary at: If technical exhaust or ventilation measures are not possible or insufficient, respiratory protection must be worn. Suitable respiratory protection apparatus: Wear respiratory protection. Remark: The filter class must be suitable for the maximum contaminant concentration (gas/vapour/aerosol/particulates) that may arise when handling the product. If the concentration is exceeded, self-contained breathing apparatus must be used. Remark: Observe the wear time limits as specified by the manufacturer. Remark: Use only respiratory protection equipment with CE-symbol including four digit test number.

**Environmental exposure controls**

No special measures are necessary.
