TATA box binding protein Control kit
Technical Data Sheet

Reference: RT-CKYD-TBP

Products and procedures described in this protocol are intended for research purposes only.

Storage conditions

The TATA box binding protein Control kit should be stored at -15 °C to -25 °C in a constant temperature freezer. When stored under these conditions the reagents are stable for 1 year.

Kit contents

The TATA box binding protein Control kit contains enough reagents for up to 250 - 50 µl reactions.

<table>
<thead>
<tr>
<th>Reagent</th>
<th>Volume</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TBP primer mix (plain cap)</td>
<td>750 µl</td>
<td>One tube of primer mix 10 µM</td>
</tr>
<tr>
<td>TBP probe (brown cap)</td>
<td>250 µl</td>
<td>One tube of 12.5 µM Yakima Yellow®-Eclipse® DarkQuencher probe</td>
</tr>
</tbody>
</table>

TATA box binding protein Control kit Yakima Yellow®-Eclipse® DarkQuencher should be combined with Eurogentec Reverse Transcriptase core kit (first strand reaction kit) reference RT-RTCK-05 followed by Eurogentec qPCR MasterMixes, reference RT-QP2X-03 or qPCR Core kits, reference RT-QP73-05. Alternatively a One step RTqPCR MasterMix Plus, reference RT-QPRT-032X can also be combined with the Control kit.

The kit is available with a Yakima Yellow®-Eclipse® DarkQuencher labelled probe detected in channel 2 for multiplex qPCR.

Procedure

We strongly recommend preparation of a reaction mix

Each 50 µl reaction requires the addition of 3 µl of TBP Primer Mix (plain cap) and 1 µl of TBP Probe (brown cap).

If required a mix containing the appropriate amount of both primer and probe can be prepared. Dispense 4 µl of this mix per 50 µl reaction.

Final concentration of primers is 600 nM.

Final concentration of probe is 250 nM.

Prepare an appropriate dilution series of chromosomal DNA in TE or PCR grade water and a no template control.

TATA box binding protein Control Kit has been developed to detect the human TATA box binding protein gene (cDNA only). The obtained amplicon is 145 bp in length, to guarantee an efficient PCR.

Program the Real-Time thermocycler using the following recommended parameters:

<table>
<thead>
<tr>
<th>HotGoldStar activation</th>
<th>10 min. 95 °C</th>
</tr>
</thead>
<tbody>
<tr>
<td>40 Cycles</td>
<td>15 sec. 95 °C</td>
</tr>
<tr>
<td></td>
<td>1 min. 60 °C</td>
</tr>
<tr>
<td>Hold at 25 °C forever</td>
<td></td>
</tr>
</tbody>
</table>

If UNG is used, program the Real-Time thermocycler using the following recommended parameters:

<table>
<thead>
<tr>
<th>UNG activation</th>
<th>2 min. 50 °C</th>
</tr>
</thead>
<tbody>
<tr>
<td>HotGoldStar activation / UNG inactivation</td>
<td>10 min. 95 °C</td>
</tr>
<tr>
<td>40 Cycles</td>
<td>15 sec. 95 °C</td>
</tr>
<tr>
<td></td>
<td>1 min. 60 °C</td>
</tr>
<tr>
<td>Hold at 50 °C forever</td>
<td></td>
</tr>
</tbody>
</table>
Other Eurogentec Control Kits available:

Eurogentec has developed control kits that can be used for either cDNA or cDNA and gDNA.

18S rRNA Control Kit
human, rat, mouse, rabbit cDNA an gDNA
very high expression level
RT-CKYD-18S or RT-CKFT-18S

23S rRNA Control kit
E.coli
very high expression level
RT-CKFT-23S

28S rRNA Control Kit
human, mouse cDNA and gDNA
very high expression level
RT-CKYD-28S

β-actin Control Kit
human cDNA and gDNA
high expression level
RT-CKYD-ACTB

GAPDH Control kit
human cDNA
high expression level
RT-CKYD-GAPD

β-2-microglobulin Control Kit
human cDNA and gDNA
high expression level
RT-CKYD-B2M

Ubiquitin C Control kit
human cDNA and gDNA
high expression level
RT-CKYD-UBC

Phospholipase A2 Control Kit
human cDNA
medium expression level
RT-CKYD-YWHAZ

Hypoxanthine phosphoribosyltransferase Control Kit
human cDNA
medium expression level
RT-CKYD-HPRT1

Ribosomal protein L13a Control Kit
human cDNA
medium expression level
RT-CKYD-RPL13A

Succinate dehydrogenase complex Control Kit
Human cDNA
medium expression level
RT-CKYD-SDHA

TATA box binding protein Control kit
human cDNA
low expression level
RT-CKYD-TBP

Hydroxymethyl-bilane synthase Control Kit
human cDNA
low expression level
RT-CKYD-HMBS
