# Safety Data Sheet (SDS)

Revision Number: 3.0	Last upda	ted March 25, 202			
1. Product and Company Identification					
Product Name:	Hoechst 33258, 20 mM solution in water				
Manufacturer/Supplier:	AnaSpec, Inc.				
	www.anaspec.com				
	34801 Campus Drive				
	Fremont, CA 94555				
	Tel: 510-791-9560				
	Fax: 510-791-9572				
	Email: service@anaspec.com				
	Kaneka Eurogentec SA,				
	Rue du Bois Saint Jean 5 4102 Seraing Belgi	um			
	Tel. +32-4-3727400				
	Fax. +32-4-3727500				
	E-mail info@eurogentec.com				
	Kaneka Eurogentec Helpdesk				
	Tel. +32-4-3727665				
Catalog Number	AS-83219				
Unit Size	5 mL				

## 2. Hazards Identification

*Emergency Overview:* We do recommend handling all chemicals with caution. Use proper protective equipment when handling chemicals. To our knowledge, the hazards of this material have not been thoroughly investigated.

GHS Hazard Classification:

Not a hazardous substance or mixture.

GHS Signal Words: None

GHS Hazard Statements:

Not a hazardous substance or mixture

GHS Precautionary Statements:

Not a hazardous substance or mixture

Potential Health Effects for:

*Inhalation:* If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Good hygiene practice requires that exposure be kept to a minimum and that suitable control measures be used in an occupational setting.

Ingestion: If swallowed, wash out mouth with water provided person is conscious. Call a physician.

Skin: In case of contact, immediately wash skin with soap and copious amount of water.

Eyes: In case of contact, immediately flush eyes with copious amounts of water for at least 15 minutes.

Chronic Exposures: No information available. We recommend limiting prolonged exposure.

Target Organs: No information available

## 3. Composition

*Ingredients/Components:* 

Chemical Name: Hoechst 33258, 20 mM solution in water

Molecular formula: C25H27Cl3N6O

Molecular weight: 533.9 CAS-No 23491-45-4

EC-No N/A

### 4. First Aid Measures

Inhalation:	If dust is inhaled, remove from contaminated area.			
	Encourage patient to blow nose to ensure clear passage of breathing.			
	If irritation or discomfort persists seek medical attention.			
Ingestion:	If swallowed do <b>NOT</b> induce vomiting.			
	If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration.			
	Observe the patient carefully.			
	Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink.			
	Seek medical advice.			
Skin:	If skin or hair contact occurs:			
	Flush skin and hair with running water (and soap if available).			
	Seek medical attention in event of irritation.			
Eyes:	If this product comes in contact with the eyes:			
j	Wash out immediately with fresh running water.			
	Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the			
	eyelids by occasionally lifting the upper and lower lids.			
	If pain persists or recurs seek medical attention.			

Extinguishing	<u>sures</u>	Water enroy or fee
Extinguishing media:		Water spray or fog. Alcohol resistant foam.
		Dry chemical powder.
		BCF (where regulations permit). Carbon dioxide
		Carbon dioxide
Special firefighting procedures:		Alert Emergency Responders and tell them location and nature of hazard.
		Wear breathing apparatus plus protective gloves.
		Prevent, by any means available, spillage from entering drains or water
		course.
		Use water delivered as a fine spray to control fire and cool adjacent
		area.
		<b>DO NOT</b> approach containers suspected to be hot.
		Cool fire exposed containers with water spray from a protected
		location.
		If safe to do so, remove containers from path of fire.
		Equipment should be thoroughly decontaminated after use.
		Equipment should be moroughly decontainmated after use.
Unusual fire and explo	sions hazards:	Emits toxic fumes under fire conditions

Engineering controls	/ Personal Protection  Local exhaust ventilation is required where solids are handled as powders or crustels:					
Engineering controls	Local exhaust ventilation is required where solids are handled as powders or crystals; even when particulates are relatively large, a certain proportion will be powdered by					
		mutual friction.				
	Exhaust ventilation should be designed to prevent accumulation and re-circulation of particulates in the workplace.  If in spite of local exhaust an adverse concentration of the substance in air could occur, respiratory protection should be considered. Such protection might consist of:					
	(a): particle dust respirators, if necessary, combined with an absorption cartridge;					
		(b): filter respirators with absorption cartridge or canister of the right type;				
	(c): fresh-air hoods or masks Build-up of electrostatic charge on the dust particle, may be prevented by bonding and grounding. Powder handling equipment such as dust collectors, dryers and mills may require					
		on measures such as explosion venting.				
	Air contaminants g	Air contaminants generated in the workplace possess varying "escape" velocities which, n turn, determine the "capture velocities" of fresh circulating air required to efficiently				
	in turn, determine					
_		remove the contaminant.				
PPE	Use personal prote	ective equipment				
9. Physical and Chemi	ical Properties					
Physical State	liquid					
Odour	Not available					
Solubility in Water	Not available					
Specific Gravity	Not available					
pH Roiling Point	Not available Not available					
Boiling Point  Melting Point	Not available  Not available					
Flash Point	N/A

11. Toxicological Info	4ian					
=	<u>rmation</u>	lav/a				
RTECS Number		N/A				

**Toxicity** 

No information available.

Health Hazards	Although ingestion is not thought to produce harmful
	effects, the material may still be damaging to the
	health of the individual following ingestion, especially
	where pre-existing organ (e.g. liver, kidney)
	damage is evident. In an occupational setting however,
	ingestion of insignificant quantities is not thought to be
	cause for concern.
Potential Hazards	Not available
Carcinogenicity:	No significant acute toxicological data identified
OSHA Permissible Exposure Limit(PEL) Data	N/A
ACGIH Threshold Limit Values (TLV)	N/A
	<u> </u>

Reproductive Toxicity:

No information available

### 12. Ecological Information

No information available.

#### 13. Disposal Considerations

All waste must be handled in accordance with local, state and federal regulations. Legislation addressing waste disposal requirements may differ by country, state and/ or territory. Each user must refer to laws operating in their area. In some areas, certain wastes must be tracked.

### 14. Transport Information

Hazard Class	N/A
Identification Number	N/A
Packing Group	N/A
Proper Shipping Name (DOT)	N/A

#### 15. Regulatory Information

California Proposition 65: N/A

US TSCA (Toxic Substance Control Act): N/A

US CERCLA (Comprehensive Environmental Response, Compensation, and Liability Act: N/A

US SARA Title III (Superfund Amendments and Reauthorization Act: N/A

US Other: N/A

EC EINICS (European Inventory of Existing Commercial Chemical Substances) Number: N/A

EC Risk Statements: N/A

Other Country Regulations: N/A

#### 16. Other Information

It is not intended for food, drug, household, agricultural or cosmetic use. A technically qualified individual experienced in handling potentially hazardous chemicals must supervise its use. The

above information is believed to be correct but does not purport to be all inclusive and shall be used only as a guide. Users should make independent decisions regarding completeness of the information based on all sources available. AnaSpec shall not be held liable for any damage resulting from handling or from contact with the above product.
