Safety Data Sheet (SDS)

1. Product and Company Identification

Product Name: 5(6) - TRITC
[Tetramethylrhodamine - 5 - (and - 6) - isothiocyanate]

Manufacturer/Supplier:
AnaSpec, Inc.
www.anaspec.com
34801 Campus Drive
Fremont, CA 94555
Tel: 510-791-9560
Fax: 510-791-9572
Email: service@anaspec.com

Kaneka Eurogentec SA,
Rue du Bois Saint Jean 5 4102 Seraing Belgium
Tel. +32-4-3727400
Fax. +32-4-3727500
E-mail info@eurogentec.com

Kaneka Eurogentec Helpdesk
Tel. +32-4-3727665

Catalog Number
AS-81150

2. Hazards Identification

Emergency Overview: We do recommend handling all chemicals with caution. Use proper protective equipment when handling chemicals. To our knowledge, the hazards of this material have not been thoroughly investigated.

GHS Hazard Classification:

- Skin irritation (Category 2)
- Eye irritation (Category 2A)
- Respiratory sensitization (Category 1)
- Skin sensitization (Category 1)
- Specific target organ toxicity - single exposure (Category 3)

GHS Signal Words: DANGER

GHS Hazard Symbol/Pictogram:
GHS Hazard Statements:
H315 Causes skin irritation
H317 May cause an allergic skin reaction.
H319 Causes serious eye irritation
H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled
H335 May cause respiratory irritation

GHS Precautionary Statements:
P261 Avoid breathing dust/ fume/ gas/ mist/ vapours/ spray
P280 Wear protective gloves
P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing
P342+P311 If experiencing respiratory symptoms: Call a POISON CENTER or doctor/ physician

Potential Health Effects for:
Inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Good hygiene practice requires that exposure be kept to a minimum and that suitable control measures be used in an occupational setting.

Ingestion: If swallowed, wash out mouth with water provided person is conscious. Call a physician.

Skin: In case of contact, immediately wash skin with soap and copious amount of water.

Eyes: In case of contact, immediately flush eyes with copious amounts of water for at least 15 minutes.

Chronic Exposures: No information available. We recommend limiting prolonged exposure.

Target Organs: No information available

HMIS Classification
Health hazard: 1
Flammability: 0
Reactivity Hazard: 0

NFPA Rating
Health hazard: 1
Fire: 0
Reactivity Hazard: 0

3. Composition / Information on Ingredients

Chemical Name: 5(6)-TRITC; [Tetramethylrhodamine –5-(and 6)-isothiocyanate]; xanthylum, 9-(2-carboxy isothiocyantophenyl)-3,6-bis-(dimethylamino)-inner salt
Molecular Formula: C25H21N3O3S
Molecular Weight: 443.5
CAS –No: 95197-95-8
**Ingredients/Components:**

### 4. First Aid Measures

**Inhalation:**
- If dust is inhaled, remove from contaminated area.
- Encourage patient to blow nose to ensure clear passage of breathing.
- If irritation or discomfort persists seek medical attention.

**Ingestion:**
- If swallowed do NOT induce vomiting.
- If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration.
- Observe the patient carefully.
- Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink.
- Seek medical advice.

**Skin:**
- If skin or hair contact occurs:
  - Flush skin and hair with running water (and soap if available).
  - Seek medical attention in event of irritation.

**Eyes:**
- If this product comes in contact with the eyes:
  - Wash out immediately with fresh running water.
  - Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids.
  - If pain persists or recurs seek medical attention.

### 5. Fire Fighting Measures

**Extinguishing media:**
- Water spray or fog.
- Alcohol resistant foam.
- Dry chemical powder.
- BCF (where regulations permit).
- Carbon dioxide

**Special firefighting procedures:**
- Alert Emergency Responders and tell them location and nature of hazard.
- Wear breathing apparatus plus protective gloves.
- Prevent, by any means available, spillage from entering drains or water course.
- Use water delivered as a fine spray to control fire and cool adjacent area.
- DO NOT approach containers suspected to be hot.
- Cool fire exposed containers with water spray from a protected location.
- If safe to do so, remove containers from path of fire.
- Equipment should be thoroughly decontaminated after use.

**Unusual fire and explosions hazards:**
- Emits toxic fumes under fire conditions

### 6. Accidental Release Measures

**Spill response**
- Remove all ignition sources.
- Clean up all spills immediately.
- Avoid contact with skin and eyes.
- Control personal contact by using protective equipment.
- Use dry clean up procedures and avoid generating dust.
- Place in a suitable, labeled container for waste disposal.

**Containment**
- Avoid all personal contact, including inhalation.

Toll-Free: 800-452-5530 • Tel: 510-791-9560 • Fax: 510-791-9573
Wear protective clothing when risk of exposure occurs.  
Use in a well-ventilated area.  
DO NOT enter confined spaces until atmosphere has been checked.  
DO NOT allow material to contact humans, exposed food or food utensils.  
Avoid contact with incompatible materials.  
When handling, DO NOT eat, drink or smoke.  
Keep containers securely sealed when not in use.  
Avoid physical damage to containers.  
Always wash hands with soap and water after handling.  
Use good occupational work practice.  
Empty containers may contain residual dust which has the potential to accumulate following settling. Such dusts may explode in the presence of an appropriate ignition source.  
Do NOT cut, drill, grind or weld such containers

### 7. Handling and Storage

Store at 4 °C desiccated and protected from light. Store away from oxidizing agent.

### 8. Exposure Controls / Personal Protection

**Engineering controls**  
Local exhaust ventilation is required where solids are handled as powders or crystals; even when particulates are relatively large, a certain proportion will be powdered by mutual friction.  
Exhaust ventilation should be designed to prevent accumulation and re-circulation of particulates in the workplace.  
If in spite of local exhaust an adverse concentration of the substance in air could occur, respiratory protection should be considered. Such protection might consist of:  
(a): particle dust respirators, if necessary, combined with an absorption cartridge;  
(b): filter respirators with absorption cartridge or canister of the right type;  
(c): fresh-air hoods or masks  
Build-up of electrostatic charge on the dust particle, may be prevented by bonding and grounding.  
Powder handling equipment such as dust collectors, dryers and mills may require additional protection measures such as explosion venting.  
Air contaminants generated in the workplace possess varying "escape" velocities which, in turn, determine the "capture velocities" of fresh circulating air required to efficiently remove the contaminant.

**PPE**  
Respiratory protection  
Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).  
Hand protection  
Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.  
Eye protection
Face shield and safety glasses Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU). Skin and body protection Complete suit protecting against chemicals, Flame retardant antistatic protective clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace. Hygiene measures Avoid contact with skin, eyes and clothing. Wash hands before breaks and immediately after handling the product.

Reproductive Toxicity: No information available

### 12. Ecological Information

No information available.
13. Disposal Considerations

All waste must be handled in accordance with local, state and federal regulations. Legislation addressing waste disposal requirements may differ by country, state and/or territory. Each user must refer to laws operating in their area. In some areas, certain wastes must be tracked.
