## 2. Hazards Identification

**Emergency Overview:** Acute Health Hazard, Irritant. We recommend handling all chemicals with caution. Use proper protective equipment when handling chemicals.

**GHS Hazard Classification:**
- GHS Physical Hazards
- GHS Health and Environmental Hazards

**Harmful if Inhaled**
- Toxic if Swallowed,
- May cause skin irritation
- Causes Eye Irritation

**GHS Signal Words:** Irritant- Toxic if swallowed

**GHS Hazard Statements:** H301,H302, H312, H315, H332 Toxic if swallowed or avoid direct contact with skin.

**GHS Precautionary Statements:** P101, P103, P302, H340 Respiratory irritant if inhaled. May cause respiratory tract irritation.

**Potential Health Effects for:**
- **Inhalation:** If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Good hygiene practice requires that exposure be kept to a minimum and that suitable control measures be used in an occupational setting.
- **Ingestion:** If swallowed, wash out mouth with water provided person is conscious. Call a physician immediately.
- **Skin:** In case of contact, immediately wash skin with soap and copious amount of water.
- **Eyes:** In case of contact, immediately flush eyes with copious amounts of water for at least 15 minutes.
Chronic Exposures: No information available. It is an irritant. We recommend limiting prolonged exposure.

Target Organs: Mucous membrane and upper respiratory tract

3. Composition

Ingredients/Components:

Chemical Name: ADHP
10 - Acetyl - 3,7 - dihydroxyphenoxazine
C_{14}H_{11}NO_4
Molecular weight: 257.3
CAS-No 119171-73-2
EC-No N/A

4. First Aid Measures

Inhalation: If dust is inhaled, remove from contaminated area. Encourage patient to blow nose to ensure clear passage of breathing. If irritation or discomfort persists seek medical attention.

Ingestion: If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration. Observe the patient carefully. Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink. Seek medical advice immediately.

Skin: If skin or hair contact occurs: Flush skin and hair with running water (and soap if available). Seek medical attention in event of irritation.

Eyes: If this product comes in contact with the eyes: Wash out immediately with fresh running water. Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids. If pain persists or recurs seek medical attention.
5. **Fire Fighting Measures**

| **Extinguishing media:** | Water spray or fog.  
|                          | Alcohol resistant foam.  
|                          | Dry chemical powder.  
|                          | BCF (where regulations permit).  
|                          | Carbon dioxide |

| **Special firefighting procedures:** | Alert Emergency Responders and tell them location and nature of hazard.  
|                                   | Wear breathing apparatus plus protective gloves.  
|                                   | Prevent, by any means available, spillage from entering drains or water course.  
|                                   | Use water delivered as a fine spray to control fire and cool adjacent area.  
|                                   | **DO NOT** approach containers suspected to be hot.  
|                                   | Cool fire exposed containers with water spray from a protected location.  
|                                   | If safe to do so, remove containers from path of fire.  
|                                   | Equipment should be thoroughly decontaminated after use. |

| **Unusual fire and explosions hazards:** | Emits toxic fumes under fire conditions |

6. **Accidental Release Measures**

| **Spill response** | Remove all ignition sources.  
|                   | Clean up all spills immediately.  
|                   | Avoid contact with skin and eyes.  
|                   | Control personal contact by using protective equipment.  
|                   | Use dry clean up procedures and avoid generating dust.  
|                   | Place in a suitable, labeled container for waste disposal |

| **Containment** | Avoid all personal contact, including inhalation.  
|                | Wear protective clothing when risk of exposure occurs.  
|                | Use in a well-ventilated area.  
|                | **DO NOT** enter confined spaces until atmosphere has been checked.  
|                | **DO NOT** allow material to contact humans, exposed food or food utensils.  
|                | Avoid contact with incompatible materials.  
|                | When handling, **DO NOT** eat, drink or smoke.  
|                | Keep containers securely sealed when not in use.  
|                | Avoid physical damage to containers.  
|                | Always wash hands with soap and water after handling.  
|                | Use good occupational work practice.  
|                | Empty containers may contain residual dust which has the potential to accumulate following settling. Such dusts may explode in the presence of an appropriate ignition source.  
|                | **DO NOT** cut, drill, grind or weld such containers |

| **PPE** | Use personal protective equipment |

7. **Handling and Storage**

Store at -20°C desiccated and protected from light. Store away from oxidizing agent.
8. Exposure Controls / Personal Protection

Engineering controls
Local exhaust ventilation is required where solids are handled as powders or crystals; even when particulates are relatively large, a certain proportion will be powdered by mutual friction.
Exhaust ventilation should be designed to prevent accumulation and re-circulation of particulates in the workplace.
If in spite of local exhaust an adverse concentration of the substance in air could occur, respiratory protection should be considered. Such protection might consist of:
(a): particle dust respirators, if necessary, combined with an absorption cartridge;
(b): filter respirators with absorption cartridge or canister of the right type;
(c): fresh-air hoods or masks
Build-up of electrostatic charge on the dust particle, may be prevented by bonding and grounding.
Powder handling equipment such as dust collectors, dryers and mills may require additional protection measures such as explosion venting.
Air contaminants generated in the workplace possess varying "escape" velocities which, in turn, determine the "capture velocities" of fresh circulating air required to efficiently remove the contaminant.

PPE
Use personal protective equipment

9. Physical and Chemical Properties

12. Ecological Information
No information available.

13. Disposal Considerations
All waste must be handled in accordance with local, state and federal regulations. Legislation addressing waste disposal requirements may differ by country, state and/or territory. Each user must refer to laws operating in their area. In some areas, certain wastes must be tracked.

15. Regulatory Information

*California Proposition 65:* This product does not contain chemicals listed under Proposition 65.

*US TSCA (Toxic Substance Control Act):* N/A
*US CERCLA (Comprehensive Environmental Response, Compensation, and Liability Act):* N/A
*US SARA Title III (Superfund Amendments and Reauthorization Act):* N/A
*US Other:* N/A

*EC EINICS (European Inventory of Existing Commercial Chemical Substances) Number:* N/A

*EC Risk Statements:* N/A

*Other Country Regulations:* N/A

16. Other Information
It is not intended for food, drug, household, agricultural or cosmetic use. A technically qualified individual experienced in handling potentially hazardous chemicals must supervise its use. The above information is believed to be correct but does not purport to be all inclusive and shall be used only as a guide. Users should make independent decisions regarding completeness of the information based on all sources available. AnaSpec shall not be held liable for any damage resulting from handling or from contact with the above product.
